

Solution & Application Oriented Lighting Products

EYE Specialty Lamps

- **Save Energy**
- **Reduce Maintenance and Lamp Replacement Costs**
- **Improve Lighting Levels and Quality of Light**
- **Comply with EPA Regulations**

Lighting users often find that their lighting needs change over time. Until now, this typically required replacement of existing fixtures and lighting systems which can be prohibitively expensive; that's where EYE Lighting engineered solutions apply. So if you want to save energy, improve light quality, increase light levels, and reduce lighting maintenance costs, just screw in the EYE lamp of your choice. No system change is required.

Standard HID Lighting Products are a costly business expense. EYE Lighting products provide application oriented solutions with a high return on investment that fund your lighting budget. No new fixture or system changes are needed. Just simply replace the existing HID lamp with an EYE specialty HID lamp.

And as you know, the efficient use of our natural resources and the ultimate impact of energy production on the environment is a universal concern. EYE energy saving products address these issues, and take it one step farther. Check out EYE "EN" products which protect the environment by meeting the federal EPA TCLP test criteria for non-hazardous waste.
