## ISL SERIES AISLE LIGHTER HIGH LUMEN BIAX PATENT PENDING

### GENERAL DESCRIPTION

The ISL SERIES is designed to be suspended individually from the ceiling on a pendant or hook.

Ideal for warehouses and distribution centers to optimally light aisles of racking and merchandise.

A high efficiency, high lumen biax fixture with flexibility and efficiency for retail, commercial and institutional applications.

Several reflector, lamp and ballast types are available. See ordering guide.

### CONSTRUCTION

Main housings are brake formed and permanently riveted together, reflectors are riveted to ballast covers which are fastened to the housing using hex nuts.

20 gauge N.Y.C. approved is optional.

Finish on housing is baked white enamel with 87% reflectivity.

Bracket assembly is constructed of 18 gauge galvanized steel brake formed and permanently riveted together. A splice box with 1/2" KO's is incorporated into the bracket.

Fixture assemblies simply slide onto the bracket assembly and are fastened in place by a single screw.

### ELECTRICAL SPECIFICATIONS
