Why choose Natural Daylight Compact Fluorescent Bulbs?

Saves Energy

Compact Fluorescents use 75% less energy than ordinary bulbs.

Reduces Pollution

Using less energy reduces pollution while conserving our natural resources

Saves Money

Reduced electric bills and cost of frequent replacements saves you money

Provides Healthy Natural Lighting

Simulates the balanced spectrum of natural white light.

The Verilux® Natural Daylight Compact Fluorescent lamp provides you with 10,000 hours of natural white light. By using less energy, you help to preserve our natural resources and reduce pollution. Ultimately, you will replace fewer bulbs and save money on your electric bill while enjoying the benefits of natural light indoors.

Studies have shown that natural daylight contributes to an overall sense of health and well being. Being outdoors on a sunny day helps lift your energy level while improving your mood and appearance.
