1. The purpose of this modification is to add ESL Milk category 1 & 2 items, and chilled juices to the list of items to be sourced, catalogued, managed and distributed by the Prime Vendor. This change will facilitate consolidated ordering and deliveries in keeping with the basic tenets of the PV program. Estimated quantities and descriptions have been previously provided. Additional items will be added as necessary through the catalog update process based on customer requirements.
2. The DSCP-P COR will continue to provide order quantities each week to our DSCP ESL Account Manager who will provide Coastal with a Japan cube table for ordering purposes. Customers will order their ESL directly from the Prime Vendor catalog. The PV will be responsible to enact any necessary claims with the manufacturer should there be product defects. Since the Government will retain the responsibility of demand planning, Coastal may submit an end of month manual invoice for any product that expires without being ordered. The Contracting Officer will fund the invoice and provide the vendor with call/clin information so that they can submit it to DFAS for payment.
3. There is the potential that in the future this category of items may be removed from the catalog should a central buy be performed, or that the PV may be tasked to acquire product from a required source. While ESL is part of the catalog, it is the PV's responsibility, as with all catalogued items, to manage their supplier arrangements with a view to maximize both quality and economy, understanding that milk is an important quality of life item for our overseas personnel. Product needs to be provided that will function well in the customer's machines and be packed in sturdy boxes to allow stacking five high without crushing.
4. The following are the current stock numbers which need to be catalogued and supported:
