**EVALUATION FACTORS FOR AWARD**

**BUSINESS PROPOSAL EVALUATION**

The following evaluation factors are of equal importance.

***I. AGGREGATE PRICING***

Pricing is required for all items found in the **Master Market Basket (MMB)**. The Government will perform a comparative assessment of the pricing of each item found in the MMB to identify any unusually high or low priced items. The Government will perform an aggregate price analysis on the approximate fifty (50) items per zone selected for inclusion in the **Aggregate Dollar Market Basket (ADMB)**. The estimated quantities in the ADMB shall be multiplied by the unit prices to determine the lowest overall cost to the Government. These figures will then be totaled to arrive at an estimated aggregate value. Pricing will be evaluated for all option years in the same manner. All five (5) totals will be added together to determine the lowest overall cost to the Government. A Price Reliability Evaluation will also be performed.

***II. DISTRIBUTION PRICES***

The Government will evaluate each offeror's distribution prices by determining an aggregate distribution price dollar value for the approximately fifty (50) items, per zone, which make up the ADMB. This will be determined by multiplying the distribution prices by the estimated yearly requirements for the items listed in the solicitation. The aggregate distribution dollar value will then be evaluated for reasonableness and overall low cost to the Government. Distribution prices, for all categories that do not relate to the market basket items, will be evaluated for fairness and reasonableness. The percentage of distribution fee to total aggregate cost will also be evaluated.

***III. CATEGORY DISTRIBUTION PRICES***

The Government will evaluate each offeror's distribution prices for each category by determining an aggregate distribution price dollar value based on each category and its corresponding distribution price. The aggregate dollar value will then be evaluated for overall low cost to the Government.
