(Signature of person authorized to sign)			

I. Subject contract is hereby changed as follows:

Force Protection (Background): The DSCP Subsistence Directorate provides world-class subsistence logistics support during peace-time as well as during regional conflicts, contingency operations, national emergencies and natural disasters. At any time, the United States Government, its personnel and/or its resources and interests may be the target of enemy aggression to include espionage, sabotage and /or terrorism. This increased risk requires DSCP to take steps and insure steps are taken to prevent the deliberate tampering and the contamination of subsistence items. The term force protection refers to those procedures and plans which are in place to safeguard product.

A. Based on the above, a determination was made to incorporate a Force Protection Plan into subject contract. Under this force protection plan, the vendor is responsible for the following:

1. The vendor will insure that products and/or packaging have not been altered, tampered or otherwise contaminated throughout the manufacturing, storage and delivery process, and will inform DSCP immediately of any attempt or suspected attempt by any party or parties, known or unknown to contaminate supplies. When notifying DSCP of such an event, the information provided should include:

- Date of Incident
- Customer Name, Address, Phone Number
- Specific Line Item Affected
- Observations made by delivery personnel and customers regarding the incident
- Regulatory agency or agencies involved
- Were law enforcement agencies contacted
- How was the incident resolved and what conclusions were drawn by the regulatory agency
- What changes were made to prevent a recurrence of the event

2. The contractor's facility should be secured by fences and/or guards, and incoming freight carriers should be required to make appointments 24 hours prior to the delivery of the product. All incoming freight carriers will be inspected and their seal numbers matched and recorded by security personnel.

3. Personnel working at the contractor's facility should carry identification badges, and procedures will be in place to limit access to sensitive areas of the facility to only those who require it.

4. When possible, background checks should be conducted on all truck drivers. The Contractor should remain in constant contact with delivery personnel throughout the workday. DSCP endorses the use of on-board computer software, currently in use at a number of manufacturing/distribution establishments, which tracks an entire day for each trailer.

5. Seals should be used at all times, and procedures should be in place to prevent tampering with the seals and/or locks once they are placed on the trailer. Procedures will be put in place for the security of the trailer during delivery and the locking of the trailer following the completion of the delivery.

B. The Government reserves the right to inspect the contractor's facility to insure appropriate security measures are in place.

III. All other terms and conditions of subject contract remain the same.
